

GEOGRAPHY STUDIES A LEVEL – SUMMER ASSIGNMENT

TOPIC: GLOBALISATION

FOCUS: FAST FASHION

The planet is overwhelmed with clothes; close to 56 million tonnes are sold every year.

Thanks to low-cost, disposable fashion produced at record speeds, many people can now constantly update their wardrobes. But this comes at a great price to the environment and humanity. Pollution, very low paid factory workers, associated community health problems and even our manipulated consumer psyches are all the consequences of this growing industry.
